

**THE RECONSTRUCTION OF THE EARTHQUAKE FACILITIES**  
**XXXXX Project**  
**(XXXX)**

# **Concrete Work Plan**

**Contractor YYYYY**

## INDEX

1. General provisions
  - 1.1 Purpose
  - 1.2 Coverage
2. General matter
  - 2.1 Work summary
  - 2.2 Work schedule
  - 2.3 Management organization
3. Design specification / Required quality
  - 3.1 Design specification
    - 3.1.1 Sort of Cement
    - 3.1.2 Sort of Gravel
    - 3.1.3 Sort of Concrete
    - 3.1.4 Design strength
    - 3.1.5 Slump
    - 3.1.6 Required air content
    - 3.1.7 Maximum value of water-cement ratio
    - 3.1.8 Air dried specific gravity
    - 3.1.9 Sort of admixture
  - 3.2 Required quality
4. Material
  - 4.1 Volume of concrete
  - 4.2 Mixing
    - 4.2.1 Test mixing plan
    - 4.2.2 Mixing design
5. Concrete placing plan
  - 5.1 Preparation before placing concrete
    - 5.1.1 Preparation confirmation item
    - 5.1.2 Far-famed Casting plan
  - 5.2 Casting plan
    - 5.2.1 Casting sector
    - 5.2.2 Water curing plan
    - 5.2.3 Casting order / Casting method
    - 5.2.4 Spudding, spading, tamping, vibrating
    - 5.2.5 Construction Joint
    - 5.2.6 Average plan
    - 5.2.7 Manning plan
    - 5.2.8 Sort-out and Cleaning
6. Curing plan
  - 6.1 Early-age curing
    - 6.1.1 Curing method
    - 6.1.2 Duration of curing
  - 6.2 Winter concrete curing
    - 6.2.1 Curing method
    - 6.2.2 Duration of curing
  - 6.3 Keeping duration of Shuttering and Support
7. Quality control system
  - 7.1 Test of using Material

- 7.2 Official test organization
- 7.3 Compressive strength test
  - 7.3.1 Compressive strength test at the site
  - 7.3.2 Test piece curing
  - 7.3.3 Report of Test result
- 7.4 Concrete surface test
- 8. Security plan at Concrete work
